PROFESSIONAL SUMMARY

Results-driven Full Stack AI Engineer with 3 years of professional experience designing, developing, and deploying scalable, secure, and high-performing enterprise applications across the healthcare and financial services domains. For the Forward Deployed Engineer opportunity at workato, the strongest direct alignment is in AI/ML. At Pfizer, integrated Azure AI Services, Azure OpenAI, and intelligent chatbot capabilities to automate document classification, improving operational efficiency by 29% across healthcare workflows.

TECHNICAL SKILLS

- **Cloud & AI:** Azure AI Services, Microsoft Azure (App Services, Functions, SQL Database, Storage, Service Bus, Key Vault, DevOps, Monitor, Application Insights), Azure OpenAI, AWS (EC2, S3, RDS, Lambda, CloudWatch), Event-Driven Architecture
- **Languages:** Java, JavaScript, SQL, C#, TypeScript, Python
- **Frontend:** React.js, Angular, Flutter, Redux Toolkit, Material UI, HTML5, CSS3
- **Backend & Frameworks:** Spring Boot, ASP.NET Core, .NET Core, Microservices, Spring Security, Hibernate, Node.js
- **Databases:** Azure SQL Database, SQL Server, Database Design, Stored Procedures, Query Optimization
- **DevOps & Tools:** Azure DevOps, Docker, CI/CD Pipelines, GitHub Actions, Jenkins
- **Security & Testing:** Spring Security, OAuth 2.0, JWT, RBAC, xUnit

PROFESSIONAL EXPERIENCE

Pfizer

March 2025 - Present

Software Engineering Intern

- Integrated Azure AI Services, Azure OpenAI, and intelligent chatbot capabilities to automate document classification, improving operational efficiency by 29% across healthcare workflows.
- Automated engineering workflows using AI-assisted development tools and custom Java utilities, improving delivery consistency across teams.
- Developed React, TypeScript, Redux Toolkit, and Material UI interfaces integrated with Azure App Services, improving responsiveness by 34% and streamlining clinical workflows.
- Engineered secure RESTful APIs with Java, Spring Boot, Hibernate, and Azure SQL Database, strengthening interoperability while protecting sensitive healthcare data.
- Built Java Spring Boot microservices with Azure Functions and Azure Service Bus, enabling resilient asynchronous communication across distributed cloud applications.
- Optimized SQL Server queries, stored procedures, and indexing strategies to support high-volume healthcare workloads with reliable database scalability.
- Established CI/CD pipelines using Azure DevOps, GitHub, Docker, Maven, and Jenkins, maintaining dependable deployments across development, testing, and production.
- Designed authentication and authorization with Spring Security, OAuth, JWT, and role-based access control, securing applications for internal and external users.
- Implemented Application Insights, Azure Monitor, and Log Analytics for centralized diagnostics, proactively identifying production issues and improving reliability.
- Collaborated with product managers, UX designers, QA engineers, and healthcare stakeholders to translate requirements into scalable technical solutions.

PNC Financial

January 2023 - July 2024

Full Stack Engineer

- Developed responsive React, TypeScript, and ASP.NET Core banking applications, improving user engagement by 20% through intuitive digital transaction experiences.
- Engineered secure RESTful services with ASP.NET Core and SQL Server, supporting reliable banking operations through maintainable APIs.
- Built reusable frontend modules with React Hooks, Redux Toolkit, and Material UI, simplifying feature delivery and ensuring consistent interfaces across releases.
- Integrated AWS EC2, S3, RDS, CloudWatch, and Lambda to support scalable cloud-hosted financial solutions with resilient infrastructure.
- Optimized SQL queries, stored procedures, and indexing strategies, improving database execution efficiency by 25% under high-volume transactional workloads.
- Automated deployments with GitHub Actions, Docker, and CI/CD pipelines while validating releases with xUnit and Postman, enhancing consistency across environments.

Graduate Research Assistant

- Designed and developed cross-platform mobile assessment components in Flutter for a neurocognitive assessment platform measuring reaction time, memory, attention, and motor performance.
- Architected the underlying data models and capture pipeline that recorded participant interactions and behavioral measurements with research-grade reliability and consistency.
- Translated open-ended research requirements into structured technical specifications, collaborating closely with the research team to align software design with experimental goals.
- Engineered the platform to support repeated, longitudinal measurement of cognitive performance, producing structured datasets suitable for downstream statistical and experimental analysis.
- Applied software engineering best practices to a research context, ensuring data integrity directly supported valid interpretation of experimental results.

CERTIFICATIONS & ACHIEVEMENTS

- AI For Everyone, DeepLearning.AI (Andrew Ng)
- Google Cloud Career Readiness, Associate Cloud Engineer
- HackUSF 2026, 3rd Place, developed an innovative software solution
- Smart India Hackathon 2022, National Finalist (India's largest innovation challenge)
- Best Outgoing Student (Gold Medal), outstanding academic performance and leadership

EDUCATION

Master of Science in Computer Science, University of South Florida

Bachelor of Engineering in Computer Science and Engineering, Anna University
